

At Southwire, we continue our long-term success as we focus on supporting our transit industry with sustainable ambition. We provide a variety of Buy America products that are manufactured in the USA to support the market objectives for core sustainability in accordance with the Federal Transit Administration (FTA), American Public Transportation Association (APTA), and Electric Vehicle (EV) guidelines.

Since our founding in 1950, Southwire has one mission in mind, to provide the people and the power to move our country forward. We deliver power... Responsibly®. We deliver on this promise daily by promoting innovative and sustainable solutions within the manufacturing of cables for our infrastructure, and in our mission to promote and support the growth of our nation and its people in a responsible way.

**SUSTAINABLE SUPPLY CHAIN** 

3 out of every 4 North American Transit Authorities have Southwire Overhead
